OBJECTIVE

Detail-oriented Frontend Developer with expertise in HTML, CSS, JavaScript, and React.js. Experienced in creating responsive, high-performance websites and applications. Committed to writing clean, maintainable code and improving user experiences.

SKILLS

- **Languages:** HTML5, CSS3, JavaScript
- **Frameworks/Libraries:** React Js, Tailwind CSS
- **Responsive Design**: Media queries, Flexbox, Grid, Mobile-first development
- **Backend Technologies**: Node.js, MongoDB (basic CRUD operations and integration)
- **Version Control:** Git, GitHub
- **Tools:** Visual Studio Code

EXPERIENCE

FRONT-END DEVELOPER | Algacis Info Solutions – India
March 2023 - Present

- Converted Figma designs into fully functional, responsive web pages using HTML, CSS, and React.js.

- Collaborated with the development team to implement reusable UI components using React.js.

- Optimized web pages for performance and responsiveness, improving user experience.

INDESIGN DESKTOP OPERATOR | Aptara Learning Pvt Ltd – India
May 2012 – November 2016

As an InDesign Desktop Operator, I effectively managed and produced visually compelling documents and layouts for educational books for Pearson and McGraw Hill using Adobe InDesign software.

EDUCATION

BACHELOR OF TECHNOLOGY- INFORMATION TECHNOLOGY

July 2007 – April 2011

Anna University of Technology, Tirunelveli

REMYA

PERSONAL PROJECTS

1. **E-Commerce App**

   Frontend: Built a responsive user interface using React.js and tailwind css.

   Backend: Designed and implemented a RESTful API with Node.js and Express.js for efficient data handling and communication.

   Database: Utilized MongoDB to store and manage data, implementing schema design and optimization techniques.

   Authentication: Integrated JWT-based authentication for secure user login and access control.

   Project Link: https://e-commerce-two-frontendd.vercel.app/

1. **Blog App**

   Frontend: Built a modern, responsive user interface using React.js and tailwind css

   Backend: Developed a RESTful API with Express.js and Node.js to handle blog management and user authentication.

   Database: Used MongoDB to store blog posts and user profiles..

   Authentication: Implemented secure user authentication and authorization using JSON Web Tokens (JWT).

   Project Link: https://quill-frontend-zeta.vercel.app/

2. **Food Delivery App**

   Frontend: Developed the frontend of a food delivery application using React.js

   Cart Management: Add, remove, and adjust food items in the cart with real-time price updates.

   Order Summary: Display order details before checkout, ensuring user confirmation.

   Responsive Design: Optimized layouts for mobile, tablet, and desktop devices.
